

The vegetable and fruit washing machine manufactured by WELL PLUM utilizes automated control of water volume and employs "ozone" for sterilization and disinfection, effectively removing pesticide residues. With "ultrasonic" vibrations at 40,000 times per second, it quickly cleans fine blind holes, followed by blow, overflow, and fully automatic inflow/drain management. The freshness and quality of the washed produce are well maintained. This machine operates through fully automated cleaning, requiring no manual handling; simply place the fruits and vegetables in the washing basket to achieve the most effective cleaning and preservation.

Our company customers for this type of product include households, hot pot restaurants, fresh fruit wholesale businesses, school dining services, fruit and vegetable cooperatives, employee cafeterias, agricultural associations, fishing associations, agricultural research institutes, agricultural product manufacturers, and major restaurants, among others. The cleaning effectiveness of our equipment has been tested by the Pesticide Residue Inspection Institute of National Chung Hsing University, capable of removing 12 common pesticide residues. It has also received recommendations from physicians in the Metabolism Department of Chi Mei Medical Center. Our equipment features a unique patented technology in the industry (active water and ultrasonic ozone air cascade with six fully automatic functions), Holds multiple invention patents both domestically and internationally, Award and the Gold Medal at the 2024 Paris International Invention Exhibition. It has also been featured in interviews by FTV.

Our company sells this type of products to: families, hot pot restaurants, healthy lunch boxes, fresh juice, fresh fruit wholesale industry, school catering departments, fruit cooperatives, office staff restaurants, farmers' associations, fishermen's associations, agricultural research institutes, agricultural product manufacturers and major restaurants, etc. The cleaning effect of our equipment has been tested by the National Chung Hsing University Pesticide Residue Inspection Institute. It can not only remove 12 common pesticides, but also has been recommended by Chi Mei Hospital's metabolic physician. Our equipment is a unique technology in the industry (water in and ultrasonic/ozone/blow/full-automatic six functions, etc.). Holds multiple invention patents both domestically and internationally, awarded the Taiwan Excellence Award and the Gold Medal at the 2024 International Invention Exhibition in Paris, and has also been featured in an interview by FTV.

Well-known sales performance representative
Fruit cooperative-Dahu strawberry
Hong Ruizhen sandwich-used in strawberry, pineapple cake related products
Lady M-from New York, USA, a top dessert brand listed as "Top Ten Cakes in the United States"
uMeal Excellent Grain-sold to TSMC, ASE and other large manufacturers
